

Analysis of the Development of Tourist Excursion Services in the Regions of the Republic of Uzbekistan

Ph.D, Raximov Xasan Abdusaitovich ¹

Abstract

In this article, the development of tourist excursion services in the regions of the Republic of Uzbekistan is analyzed and the trend of their development is mentioned.

Keywords: *tourism, hotel industry, population employment, gross domestic product, industry, entrepreneurship, service sector, need, social sector, hospitality, tourist services.*

¹ Associate Professor of the Samarkand Institute of Economics and Service

Expansion of hotels does not happen by itself. It is known from world practice that the development of tourism leads to the growth of the country's economy, the development of underdeveloped regions, the increase of population employment, and the rise of the culture of the population¹.

The provision of tourist services by regions in Uzbekistan requires certain costs. It can be seen that the weight of hotel expenses is high among them

The data shows sufficient information to assess the state of development of tourist excursion services in the regions of the Republic of Uzbekistan in 2007-2011. The provision of tourist services on the scale of our country was mainly carried out during 2007-2011. But in 2010, it was planned to increase this service by 127.5%. But this indicator was fulfilled by 110.6%. This growth trend was influenced by the next wave of the global financial and economic crisis that continued in these years. Because the arrival of tourists to our country had slowed down a bit. A similar situation happened in many regions. Only in the Republic of Karakalpakstan, Andijan, Jizzakh, Tashkent and Kashkadarya regions, it can be observed that it has grown more than the planned. Although the established plans for tourist excursion services were implemented at the republic level, they were systematically implemented in many regions (such as Bukhara, Syrdarya, Khorezm).

It can be seen from these that it is necessary to plan tourist services based on the real possibilities of each region. It should be recognized that a State program was developed for the development of tourism in our country and in each of its territorial divisions. These very large programs are aimed at fulfilling the specified parameters. All state and non-state organizations are engaged in this². Due to this, there are positive changes in the development trend of tourist excursion services. These types of services will also develop rapidly in the future. Due to the great attention paid to this field, the appropriate infrastructure has been created and is being improved. All this is considered a great opportunity for the development of tourism in the future. Another important aspect of the development of this sector for Uzbekistan is that it is a decisive factor in providing employment to the unemployed population in the rural areas of our country³.
